Essential does **not** mean exempt - you must still implement all safety precautions recommended by local, state and federal authorities.

**REMEMBER BEST PRACTICES**

Wash hands well and regularly. Wear gloves when operating in public spaces. Maintain social distance of six feet. Check your temperature. Most importantly, STAY HOME if you feel you may be sick.

**BE PROACTIVE**

If you feel your service site could do a better job of operating safely, SPEAK UP. These conditions are new to everyone and require caution and vigilance.

**MIND YOUR MEDIA**

Volunteers and essential employees make great role models during this crazy time! Before you post online about your service, make sure your words and images are accurate, polite and respectful.
